### What ?

Sodium Hydroxide NaOH 50% in water for use in IMO 2020 closed loop exhaust gas scrubbers water treatment.

### When and where?

Use on ships closed loop exhaust gas scrubber as alkaline feed.

Mix in COW or steam injection for cargo and fuel oil tank cleaning .

### How?

#### Exhaust scrubber unit:

Add to the scrubbers alkali holding tank as described by the scrubber manufacturer.

#### Tank Cleaning:

Use as a degreasing agent for ships cargo and fuel oil cleaning, via COW, steam or HP washing machines. Dilution will depend greatly on cargo characteristics, (white, black, crude, fuel oil etc) and use of steam or cold water. Dilute as deemed appropriate and as ships cargo operations manual and MARPOL instructions.

\*Do not use on aluminium, tin, zinc or galvanized surfaces.

### Why?

- Allow scrubber to work as designed
- Comply with IMO 2020
- Economical and effective tank cleaning
